

FARM & FIELD FENCE - SQUARE KNOT

For a more robust farm and field fence, square knot fencing offers added stability and flexibility compared to the traditional hinged joint product. It conforms to the landscape and is strong enough to withstand abuse from livestock, cattle and falling tree limbs.

This fence is available in 14 gauge and 12½ gauge wire sizes, and features graduated horizontal spacing for various livestock and wildlife. Galvanized and flexible for easy installation over uneven land. Meets ASTM A116.
